

May 29, 2019

Dear Customer,

Over the next several months, you will notice our product packaging, labels and product inserts will be changing to reflect the Curium name and brandmark. This is part of our on-going efforts to rebrand the former Mallinckrodt Nuclear Medicine LLC to Curium US LLC.

The timing of product packaging, labels and product insert changes will vary by product, however once a product is received with the new Curium brand, all future product shipments of that product will also be labelled with Curium.

The first product rebranded will be Technescan<sup>TM</sup> PYP<sup>TM</sup> (kit for the preparation of technetium Tc 99m pyrophosphate injection), beginning with customer shipments in late May 2019.

We would also like to take this time to point out the following:

- The accessories (eluant and evacuated vials) for our Ultra-Technekow V4 (technetium Tc 99m generator) will be rebranded with Curium in the July time frame. However, the Ultra-Technekow V4 generator itself will not have Curium labeling until later this year.
- The package insert for Ultra-Technekow V4 will be rebranded in July with the evacuated vials. Therefore, the package insert will be rebranded as Curium and the Ultra-Technekow V4 generator itself will have Mallinckrodt labels until October/November.

Overall, the changes are minimal, but we wanted to alert you of these changes, so you are not surprised if you notice them. Please contact Customer Service at [1.888.744.1414](tel:1.888.744.1414) if you have any questions.

Sincerely,

Michael Patterson  
V.P. of Marketing, North America
