DRAX  IMAGE®

December 1st 2011

Dear Customer,

This letter is to inform you that a new formulation of our HICON® solution has been recently approved by the FDA. Our intent is to launch this new formulation on February 7th 2012. This new formulation will replace the current one. It has the same radioactive concentration of Sodium Iodide I-131 (1 000mCi/mL) but contains an increased amount of stabilizer.

It is important to note that the shelf-life of the new formulation has also changed. The shelf-life of the HICON® solution is now 14 days from the manufacturing date. Please check the label for the exact expiry date. Capsules filled with the HICON® solution have a shelf-life of 7 days from the capsule preparation date.

We appreciate your business and look forward continuing to serve your needs for quality radiopharmaceutical products. Do not hesitate to contact the undersigned should you have questions on this change.

Sincerely yours,

François Bergeron
VP Marketing & Business Development
