

October 27, 2015

Dear Valued Customer,

As we continue our transition from the Ultra-Technekow™ DTE (Technetium Tc 99m Generator) to the Ultra-Technekow™ V4 (Technetium Tc 99m Generator), it is probable that for a short time you may have both V4 and DTE boxes in your possession. It is important to note the differences between these boxes to ensure the proper packaging is used for returns.

In accordance with 49 CFR 173.415 (U.S. Department of Transportation), Type A packages subjected to the design and testing requirements must be prepared and offered in accordance with the supplier's instructions. Thus, DTE generators must be returned in a DTE box (K620-05 (brown-colored fiberboard) or K637-05 (white-colored fiberboard)) and V4 generators must be returned in a V4 box (K620-06 (brown-colored fiberboard) or K637-06 (white-colored fiberboard)). The box sizes and markings vary by product. Further descriptive information regarding the two generator box types is provided on the following page of this communication.

If you have any questions or need to order an extra V4 or DTE box please contact your local Mallinckrodt Representative or Customer Service at 800.744.1414.

Respectfully,

David Koerber

Senior Product Manager, Generators, North America
